PROFESSIONAL SUMMARY

Security engineer and master's student in Cybersecurity & Privacy at NJIT with 2+ years of experience in security operations, scripting, and systems security. Skilled in SOC monitoring, detection engineering, malware analysis, vulnerability assessment, and building secure infrastructure. Published security researcher (ACM, IEEE) with an AfricaCERT recognition award for honeynet deployment. Cisco CyberOps Associate, CompTIA PenTest+, and ISC2 Certified in Cybersecurity. Seeking Security Engineer, SOC Analyst, Detection Engineering, or VAPT roles.

CORE SKILLS

- **SOC & Detection:** Monitoring, Alert Triage, Incident Response, Threat Hunting, Malware Analysis, Honeypots
- **Offensive Security:** VAPT, Web & Mobile Application Testing, Burp Suite, Nmap, Nuclei
- **Tools:** Elastic Security, Security Onion, MISP, Suricata, Zeek
- **Infrastructure & Automation:** Python, Bash, Proxmox, pfSense, Active Directory, DNS/DHCP, Firewalls, System Hardening

PROFESSIONAL EXPERIENCE

Research Associate — Upanzi Network / CyLab-Africa

Jan 2023 – Aug 2025 | Kigali, Rwanda

- Monitored and triaged security alerts in SOC-style environments using Elastic Security and Security Onion.
- Automated security testing and log analysis with Python and Bash scripts, improving repeatability and reducing manual effort.
- Deployed and integrated security tooling including MISP, ELK, and Suricata for visibility, enrichment, and threat analysis.
- Analyzed 200+ Android applications, identifying vulnerabilities and producing a published security report.
- Conducted and published research on mobile application security and African cyber risk (ACM, IEEE).

Teaching Assistant — Harare Institute of Technology

Mar 2019 – Jun 2021 | Harare, Zimbabwe

- Supported IT and cybersecurity course instruction, preparing labs, tutorials, and assignments.
- Supervised student projects, leading a group to achieve Distinction on their final project.
- Assisted in exam delivery and academic support.

IT Officer — ZIMASCO Pvt. Ltd.

Sep 2017 – Jul 2018 | Zimbabwe

- Provided Tier II IT and security support for 500+ enterprise users.
- Monitored and troubleshooted enterprise networks, hardware, and applications.
- Strengthened endpoint security and ensured compliance with IS policies through internal audits.

IT Intern — ZIMASCO Pvt. Ltd.

Aug 2015 – Aug 2016 | Zimbabwe

- Provided helpdesk support, logged incidents, and resolved system issues.
- Assisted with network configuration and system administration.

EDUCATION

MS in Cybersecurity & Privacy — New Jersey Institute of Technology (NJIT)

2025 – present | Newark, NJ

MS in Information Technology — Carnegie Mellon University (CMU-Africa)

Fall 2021 – Spring 2023 | Specialization: IT and Computer Networking

BTech in Information Technology — Harare Institute of Technology

Aug 2013 – Jun 2017 | First-Class Honours (Distinction)

PROJECTS

- **Honeynet Deployment (AfricaCERT):** Designed and deployed honeynets capturing real-world attacker activity and producing actionable threat intelligence; received formal recognition for the design and deployment.
- **Attack & Detect Home Lab:** Built a Proxmox lab with Windows/Linux servers, Active Directory, pfSense, and Security Onion; configured Elastic, Suricata, Zeek, and MISP to simulate attacks and practice incident response, malware analysis, and system hardening.

PUBLICATIONS

- Evaluating Mobile Banking Application Security Posture Using the OWASP MASVS Framework — ACM, 2023.
- Potential Privacy Violation in Manual Contact Tracing: A Rwanda Case Study — IEEE, 2023.

CERTIFICATIONS & AWARDS

- Cisco Certified CyberOps Associate • ISC2 Certified in Cybersecurity (CC) • CompTIA PenTest+
- AfricaCERT Recognition Award for honeynet design and deployment (MIMON & ATCHEDJI projects).
